

July 2022

To the resident,

Project Update – Arapiki Road Watermain

Asphalt & Construction Ltd has been working for Nelson City Council to construct a new watermain along Arapiki Road, from Main Road Stoke to The Ridgeway.

To date our crews have installed two new watermains in the lower section of Arapiki Road. We have completed the pressure testing on these new pipes and are ready to connect to the main lines once the upper section of the project is complete.

Unfortunately, the wet weather over the past month has affected our ability to reinstate the road and footpath. Once the weather allows and the ground has dried sufficiently, we will complete this reinstatement.

Next Tuesday (2 August 2022) weather permitting, we will begin work on the upper section of Arapiki Road. To complete this work safely we will need to close Arapiki Road to through traffic. This closure will allow us to also complete the work quicker and hopefully open the street back up sooner.

Thank you for your patience as we complete the upgrade.

Please feel free to contact me if you have any queries.
