

Saxton Road Wastewater Upgrade

Update One – September 2022

You're receiving this newsletter as you live nearby a wastewater project on Saxton Road. Nelson City Council and contractor Chings are upgrading wastewater services between 2 – 76 Saxton Road and this will have implications for traffic flow in the area.

Why are we upgrading services?

This is part of a multi-stage project to improve the Nelson Regional Sewerage Scheme's overall resilience. A secondary rising main is being installed around the Waimea inlet from the Beach Rd pumpstation in Richmond to Monaco.

How long will this take?

The project will start 3 October 2022 and is scheduled for completion March 2023. The project is split into three stages and there will be different traffic management in place for each stage.

Stage 1 will last until early November and will see the entry to Nayland and Saxton Roads from Whakatu Drive closed. Traffic detours will go via Main Road Stoke. Have a look at the map overleaf to see how this will work.

You will receive an updated notice before stages two and three with details of the traffic management and detours to expect.

The work will pause mid-December to mid-January for the Summer break. During this time the roads will be reopened.

We do expect there to be some disruption to traffic while this work takes place and will be asking the wider community to consider alternative routes or modes of transport if possible.

Who can I talk to?

For day-to-day queries about the upgrade please contact Sarah Boulton at Chings contracting: sarah@chings.co.nz or phone **03 547 0755**.

You can also contact council's project manager joel.macmillan@ncc.govt.nz
