The Residents of Hill Street North, Mako Street, Fullford Drive, John Sutton Place and Marino Grove

Asphalt and Construction will shortly be installing new water pipes on Hill Street North. This project is expected to take 10 weeks to complete. Downer will be carrying out traffic management for this project.

This work is scheduled to begin on **Monday 14 November 2022**. Working hours will be between **7:00 am and 6:00 pm - Monday to Friday**. It is programmed to be completed in mid-February.

For the duration of this project traffic will be managed through a variety of ways. This will primarily be through Stop/Go or Priority give-ways.

To allow this to occur safely, we will need to temporarily remove “on-street” parking on Hill Street North.

The exits onto Hill Street North from Mako Street and Fullford Drive will also be closed for the duration of this project. Residents will have to use alternative exits for Mako Street and Fullford Drive. This is the safest option for our staff on the work site and for road users traveling along Hill Street North.

At times we will need to dig a trench across residents’ driveways. If you are to be directly affected, then we will contact you directly to discuss property access. All other times residents will be able to access their properties while the project is underway.

No work will be carried out over the Christmas Holidays (22 December 2022 – 9 January 2023). The exits of Mako Street and Fullford Drive will be opened to traffic during this time.

Please have a chat with the traffic management staff on site if you have any other questions about access to your properties or where the best place to park would be while works are being carried out

We aim to minimise any inconvenience where possible and thank you in advance for your patience while this essential work is being carried out.

Should you have any queries please contact the below:
