

Saxton Wastewater Pipe Upgrade

Next Stage – February 2023

Work so far

This project is a multi-stage wastewater project for Nelson Regional Sewerage Business Unit. It involves upgrading the sewer pipes from the Saxton area that travel across to Monaco and onto Bells Island treatment plant.

Chings Contracting were appointed for section 8 of the project, and will continue through to section 10.

Section 8 is now complete, and traffic management from Saxton Road West has been removed.

Upcoming work

Section 10 is work that will occur beside Whakatū Drive. This work will get underway in the week starting 13 February 2022, and is expected to take 4 weeks to complete.

There will not be any detours as this project is underway; however, there will be some traffic restrictions in place. This will involve restricting speed to 50km/hr past the proposed work area, and merging two lanes of traffic into a single lane.

Please note the footpath will be closed. Commuters and other users will need to wait to be escorted safely past the work area.

Who can I talk to?

For day-to-day queries about the upgrade please contact Sarah Boulton at Chings contracting: sarah@chings.co.nz or phone **03 547 0755**.
