

Infrastructure - Capital project

WORKS NOTICE - Songer Street raised crossing

**WHAT
WHEN
TRAFFIC**

**Songer Street Railway Reserve crossing upgrade
Late May 2023 – Early July 2023
Lane closures will be in place**

WHAT ARE WE DOING:

- We are upgrading the pedestrian crossing where the Railway Reserve crosses Songer Street. This work will include installing a concrete raised table and concrete footpath extensions, painting a pedestrian crossing, and installing crossing point lights.

WHY ARE WE DOING IT:

- This work aims to improve the safety of the Railway Reserve for both pedestrians and cyclists. We've had feedback that vulnerable users (e.g. children, elderly, and cyclists) feel unsafe crossing Songer Street, especially due to speeds along this section of road.

DURATION:

- Works are due to commence late May 2023 and are expected to take approximately eight weeks to complete (weather dependent).

TRAFFIC CONDITIONS:

- There will be a single lane closure in place with a detour via Black St, Andrew St, and Neale Ave. For a short duration of the works there will be a closure of the Railway Reserve with a pedestrian detour in place via Black Street and Andrew Street. Please see our contractor on site if you have any questions.
