

Businesses open as usual near St Vincent Street

Work to upgrade the stormwater network around St Vincent Street has moved into its next stage requiring a full road closure at the Hastings Street intersection for all vehicles, pedestrians and cyclists.

Spotlight can be accessed through their entrance on Hastings Street via Washington Road, customers should follow on-street signage to make their way to the entrance. Access to and from The Warehouse and Countdown retail stores will be restricted to turning right into and left out of their St Vincent Street entry. The route is outlined in the map below.

All of this work will improve stormwater infrastructure to make sure the area can better manage the impact of more frequent heavy rain and future housing development.

Businesses in the area remain open during the seven-month construction period.

"Please be cautious when using The Warehouse carpark as there will be increased number of cyclists and pedestrians using the space alongside vehicles. We ask anyone cycling to please dismount from their bike."

All businesses in the area remain open during the construction period.
