

Kia ora,

## **Safety Improvements: Toi Toi Street -St Vincent Street Intersection**

The Toi Toi Street – Saint Vincent Street roundabout has been identified through the Waka Kotahi Road to Zero safety programme as having a high DSI (Death and Serious Injuries) crash rate that should be reduced.

There have been twenty-six recorded crashes in the 10 years from 2012 to 2021, fourteen of which have occurred in the last five years. The roundabout is at the centre of the Victory Community and has shops on three corners and a park on the fourth corner. It is on the active travel route to all local schools and the St Vincent Street separated cycle pathway passes through it.

To safely accommodate these different modes of traffic, Nelson City Council (NCC) is planning to upgrade this intersection. Several treatments are proposed to achieve this.

What are we doing:

- Installing raised platforms around the roundabout.
- Introducing traffic calming features like lane separating, kerb buildouts, footpath extension, green marking for cycle lanes.
- Adding cycling/pedestrian friendly facilities like lane separators and pedestrian crossing markings.

The following benefits are expected from this work:

- Lower speeds on the roundabout approaches – reducing the crash rate.
- Reduced severity if a crash event occurs.
- Improved pedestrian links on all approaches

We are seeking feedback from nearby business and residents on what we are proposing. This will help to inform our planning before we proceed to construction.

If you have any feedback, then we would really appreciate you letting us know. Please feel free to contact me, Pradip Rupakheti (NCC Project Manager) at [Pradip.rupakheti@ncc.govt.nz](mailto:Pradip.rupakheti@ncc.govt.nz) / Ph: 03 265 5281. We will also visit all the businesses in the coming weeks if you would like to speak to us face to face.

We look forward to hearing from you.

Ngā mihi,

Pradip Rupakheti
